

# COLLEGE OF EDUCATION

## HAYDEN NGUYEN

First, I want to find a way to get more involved on campus. By being a part of SGA's House of Representatives, I can hear many voices of our students and bring them to our community. I want to contribute our positive attitude to represent the whole body of student

Second, I want to sharpen myself to a better version every day. I want to learn from other awesome representatives. I would like to listen to their experiences, and I constantly enhance myself. Lastly, as a major in Youth Advocacy Educational Studies, I have a passion for leadership and student affairs. I want to extend my specialty by learning all moments/events that happen on campus to prepare for my next educational goals in Higher Education. And I want to represent the college of education to bring their voice to the House and contribute to the whole university.

## ABIGAIL ZUHLKE

In my tenure as a College of Education Representative and Dining Committee Chair, I have led initiatives to enact dynamic change on campus and bring comradely to our community. As I enter my final year as a Horned Frog, I am hopeful that I will have the opportunity to use my experiences and wisdom to continue bringing change to campus. While dining has been a central issue to me for the past few years, I am excited to branch out and analyze other aspects of campus life that need improvement. In regards to the College of Education, I plan on working with various junior and senior education majors to compose a "College of Education Survival Guide" full of tips and tricks about studying abroad, field experience, advising/course selection, internship opportunities, and COE specific resources. At the end of the day, if I am re-elected to represent the student body, my advocacy and actions will be based on what YOU want. I will make myself easily accessible for student concerns, suggestions, and collaboration to make sure the TCU I love is a place for everyone. Go frogs!
